

BANKING, FINTECH AND MSB COMPLIANCE

Artificial Intelligence (AI) in Anti-Money Laundering (AML)

AI has evolved remarkably from its inception in the mid-20th century, transitioning from basic algorithms and theoretical concepts to sophisticated machine learning and deep learning models that drive today's technology.

It has become a pivotal technology, continuously pushing the boundaries of what machines can learn and achieve, significantly impacting society, economy, and daily life.

The development and application of AI in anti-money laundering and BSA compliance represent a paradigm shift in how financial institutions combat financial crimes. Despite the challenges, the potential benefits of increased efficiency, improved detection capabilities, and enhanced risk management make AI an invaluable tool in the ongoing fight against money laundering.

SOLUTIONS

With over twenty years of combined experience, the Ankura.ai team has developed a patented state-of-the-art analytics platform and excels in providing analytics and AI solutions across government sectors and various industries. Leveraging the AML expertise of the newly acquired Chartwell team, we've propelled AI applications within the AML domain to unparalleled heights. Our innovative approach not only pioneers the AI territory but also sidesteps the pitfalls of the "black box" solutions often dreaded by financial institutions and regulators. Instead, we offer a transparent, intuitively outlined, and meticulously documented AML process.

HOW WE HELP

Ankura specializes in the creation and implementation of unique, patented AI and analytics technologies designed explicitly for Anti-Money Laundering (AML) initiatives. These AI-driven processes greatly enhance AML operations by optimizing the human elements of transaction monitoring and analysis. They empower financial institutions to adeptly and proficiently comply with BSA regulatory requirements and OFAC sanctions programs. Our comprehensive approach, from alert management and disposition to the generation of Suspicious Activity Reports (SARs), provides unparalleled detail and quality, ensuring clarity and compliance at every step of the AML process.

Our team of expert BSA/AML analysts is available to strengthen your financial institution's compliance efforts, seamlessly augmenting your existing resources to enhance your compliance framework. With the backing of our team, your institution will be able to implement processes that are not only highly efficient through the integration of AI but also fully overseen and documented, allowing you to stay at the forefront of regulatory developments and protect your reputation.

GENERAL CONSULTING

Assisting your institution in developing a comprehensive AI strategy that aligns with your business objectives, including identifying opportunities where AI can drive value.

AI IMPLEMENTATION AND INTEGRATION

Guiding your institution through the implementation of AI solutions, ensuring seamless integration with existing systems and processes.

SECURE ENVIRONMENT

Providing maximum security by deploying Ankura's AI within your own environment, keeping the platform behind corporate firewalls. Alternatively, you can opt to store data in Ankura's secure Azure environment, offering flexibility without compromising security.

LARGE LANGUAGE MODEL (LLM)

Employing a sophisticated generative AI LLM solution to process and generate human-like text based on the prompts and provided input. All LLM-generated output undergoes review by human analysts as a control measure to ensure AI oversight and maintain regulatory compliance.

DATA ANALYSIS

Utilizing advanced, proprietary technology for accurate analysis of transactional data directly from various data sources. With swift, secure, and seamless integration Ankura's platform facilitates efficient analysis of complex datasets.

LEARNING AND IMPROVEMENT

AI AML Analyst learns from feedback and historical data, continuously improving accuracy in case analysis and narrative generation. This learning capability allows for the refinement of AML processes and ensures effectiveness as money laundering, industry standards and regulatory expectations continue to evolve.

AUTOMATED ALERT AND CASE ANALYSIS

Quick analysis of vast amounts of data related to sanctions and AML alerts, and cases.

By understanding and contextualizing this data, Ankura's solution assists in determining the reasonableness of transactions and whether they warrant further investigation, streamlining the case disposition process.

ENHANCED DECISION MAKING

Leveraging Ankura's AI, the AI AML Analyst uses natural language processing to summarize complex cases, highlight key risks, and suggest links to money laundering indicators, enhancing decision-making and prioritizing high-risk cases for review..

EFFICIENT SAR NARRATIVE WRITING

Automated SAR writing process by generating well-structured, comprehensive narratives based on the data analyzed during the disposition process. This enhances the reporting process by ensuring consistency and completeness in the narratives, and improves the quality of reports submitted to FinCEN.

CONSISTENCY AND COMPLIANCE

LLM trained on AML regulatory requirements, institutions policies and operating procedures, and industry best practices ensure that all investigations and SAR narratives meet the necessary standards and are consistent across reports, reducing the risk of non-compliance and enhancing the effectiveness of your AML program.
